Dear Dr. Hickernell,

It is a pleasure to accept your manuscript entitled "Empirical Bernstein and betting confidence intervals for randomized quasi-Monte Carlo" in its current form for publication in the Information and Inference: A Journal of the IMA. The comments of the reviewer(s) who reviewed your manuscript are included at the foot of this letter.

Your manuscript will have a final check for any final adjustments or corrections and for you to upload your associated latex files, if not already done so, prior to production and publication. If no final adjustments are required, then it will be forwarded to Oxford University Press for preparation for publication. Please contact Shirley Letts, (imaiai.editorialoffice@paeditorial.co.uk), at the Information and Inference: A Journal of the IMA Editorial Office if you have any questions.

Also, if your manuscript has software scripts used to generate the data in the numerical section of your manuscript, then please send a zip or tar file containing a directory with the scripts, preferably with a brief file explaining which scripts to what, and a file which can be called to automatically generate all plots to Shirley Letts, Editorial Office (imaiai.editorialoffice@paeditorial.co.uk). This file would then be made available online with your manuscript under a supplementary material link. Manuscripts with such accompanying software are marked with a "Reproducible" flag.

Please note: Authors at UK institutions in the Jisc deal can publish 100% of their original research open access in both hybrid and fully open access journals published by OUP, with no charge to the author. The list of UK institutions which have opted in to the Jisc deal can be found on the OUP website, here:

[https://academic.oup.com/journals/pages/authors/production\\_and\\_publication/publication-charges/read-and-publish-agreements/participating-journals-and-institutions#ukinstitutions](https://academic.oup.com/journals/pages/authors/production_and_publication/publication-charges/read-and-publish-agreements/participating-journals-and-institutions#ukinstitutions).

I'd also like to call your attention to a change regarding who you and your authors should contact once articles are sent to OUP. As of your transition date, please begin to direct queries you would have previously directed to Journals Author Support to the SciPris Support Team via [oupsupport@scipris.com](mailto:oupsupport@scipris.com). With the launch of SciPris, various support teams will have access to messages coming through the [oupsupport@scipris.com](mailto:oupsupport@scipris.com) mailbox, which will ensure the queries are addressed quickly and in a more efficient manner.

If you have any questions about anything outlined in the document or about what your authors can expect once SciPris launches, please do not hesitate to get in touch. Otherwise, I would really appreciate your confirmation that you can complete the requested points above.

Thank you for your fine contribution. On behalf of the Editors of the Information and Inference: A Journal of the IMA, we look forward to your continued contributions to the Journal.

Sincerely,  
Dr. Jared Tanner  
Editor in Chief, Information and Inference: A Journal of the IMA
