Dear Dr. Hickernell:

Manuscript ID: IMAIAI-2025-038

Manuscript Title: Empirical Bernstein and betting confidence intervals for randomized quasi-Monte Carlo

In order to finalise the acceptance of your paper we do require you to submit the source files as well as a pdf of your paper – in order to do this we have returned the paper to your Author Centre for you to use the First Look system to upload your files.

In preparing the paper, please use the imaiai.cls file and when sending the source file for submission, please ensure that all the macros used to write your paper accompany the manuscript. Additionally, please do not forget to send your accompanying .bib or .bst files with your main .tex file.

If you are struggling to compile the tex files then please just upload a zipped Latex bundle.

If you require any further information please contact the Production team at [imaiai@straive.com](mailto:imaiai@straive.com).

Also:

Oxford requires all authors to provide a Data Availability Statement in their papers. Please could you add this section to the end of your paper, before the references, which details that any data underlying the submission is reported. If there is no original data presented, please state the following: No new data were generated or analysed in support of this review. Put it under the heading 'Data Availability Statement'
